“

*I was blown away by how welcoming everyone was...*

”

I had always been interested in becoming an MPI member but I would never make that first step. I finally attended a recruiting event and I was blown away by how welcoming everyone was. Everyone who I spoke to went out of their way to introduce me to other MPI members and expressed to me all the benefits of joining MPI.

From that moment on I knew this was something I needed to be a part of, that way I could continue building these relationships and meet new people in the industry. With only being a member for just over two months now, I have already realized new opportunities and helpful resources.
